

Program & Degree

Music Therapy

Degree

Master of Arts (Music)

Program overview

The Master of Arts in Music Program aims to create music practitioner, academics, researcher, and educator truly knowledgeable in his/her major area. The graduate is expected to be capable of exploring and creating new knowledges and practices to contribute to music in Thailand and internationally. The Master of Arts in Music consists of majors in Musicology, Music Education, Music Business, and Music Therapy.

The Musicology and Music Education majors are aimed at producing music researcher, academics, educator, and teacher who are knowledgeable in musicology or music education and capable of integrating the musical and related knowledges in his/her own career, as well as creating new knowledge to contribute to the society.

The Music Business major is aimed to produce professional music business practitioners and academics fully equipped with vision, international perspective, and readiness for nowadays' increasingly changing challenging business environment.

The Music Therapy provide the professional practitioner, as well as music therapy researcher and academics capable of exploring and creating new knowledges and practices to contribute to the field of music therapy in Thailand and internationally.
